

The devastating 7.7 magnitude earthquake that struck Myanmar on 28 March caused widespread destruction—reducing homes, hospitals, schools, and vital infrastructure to rubble—affecting over 17 million people across the country. Over 9.1 million live in the hardest-hit areas, including Mandalay and Sagaing, where entire communities have been upended, forcing people to seek shelter in makeshift conditions, disrupting markets, and bringing essential services—including running water, sanitation, and health—to the verge of collapse. The earthquake and hundreds of aftershocks hit a country already facing immense humanitarian needs. Even before the disaster, an estimated 19.9 million people in need due to ongoing conflict, displacement, and economic hardship. The 2025 Humanitarian Needs and Response Plan, already re-prioritized to address the most urgent needs, aimed to reach 3.6 million of the most severely impacted. Now, with needs escalating rapidly, the earthquake has pushed those already vulnerable even deeper into crisis—while tipping many others into new and urgent need. The international community is mobilizing to support local responders and communities and scale up assistance.

PEOPLE IN NEED  
IN EARTHQUAKE-  
PRIORITY TOWNSHIPS

647K

PEOPLE TARGETED  
IN EARTHQUAKE-  
PRIORITY TOWNSHIPS

### CLUSTER PRIORITY NEEDS

#### Education in Emergencies

Large numbers of schools destroyed or used to shelter displaced people

#### Food Security

Urgent need for ready-to-eat food and basic commodities, major damage to agriculture

#### Health

Hospitals and clinics destroyed, remaining facilities overwhelmed. Critical shortages of medical supplies and reproductive health services

#### Protection

Need to protect vulnerable people, particularly women and children

#### Shelter

Millions of people have lost their homes or shelters and are sleeping outside

#### Multi-purpose Cash

Despite extensive damages, many markets are functioning and people are able to buy what they need. Right now, most people's needs are multidimensional

#### Nutrition

Rising prices and food shortages threaten maternal & child nutrition

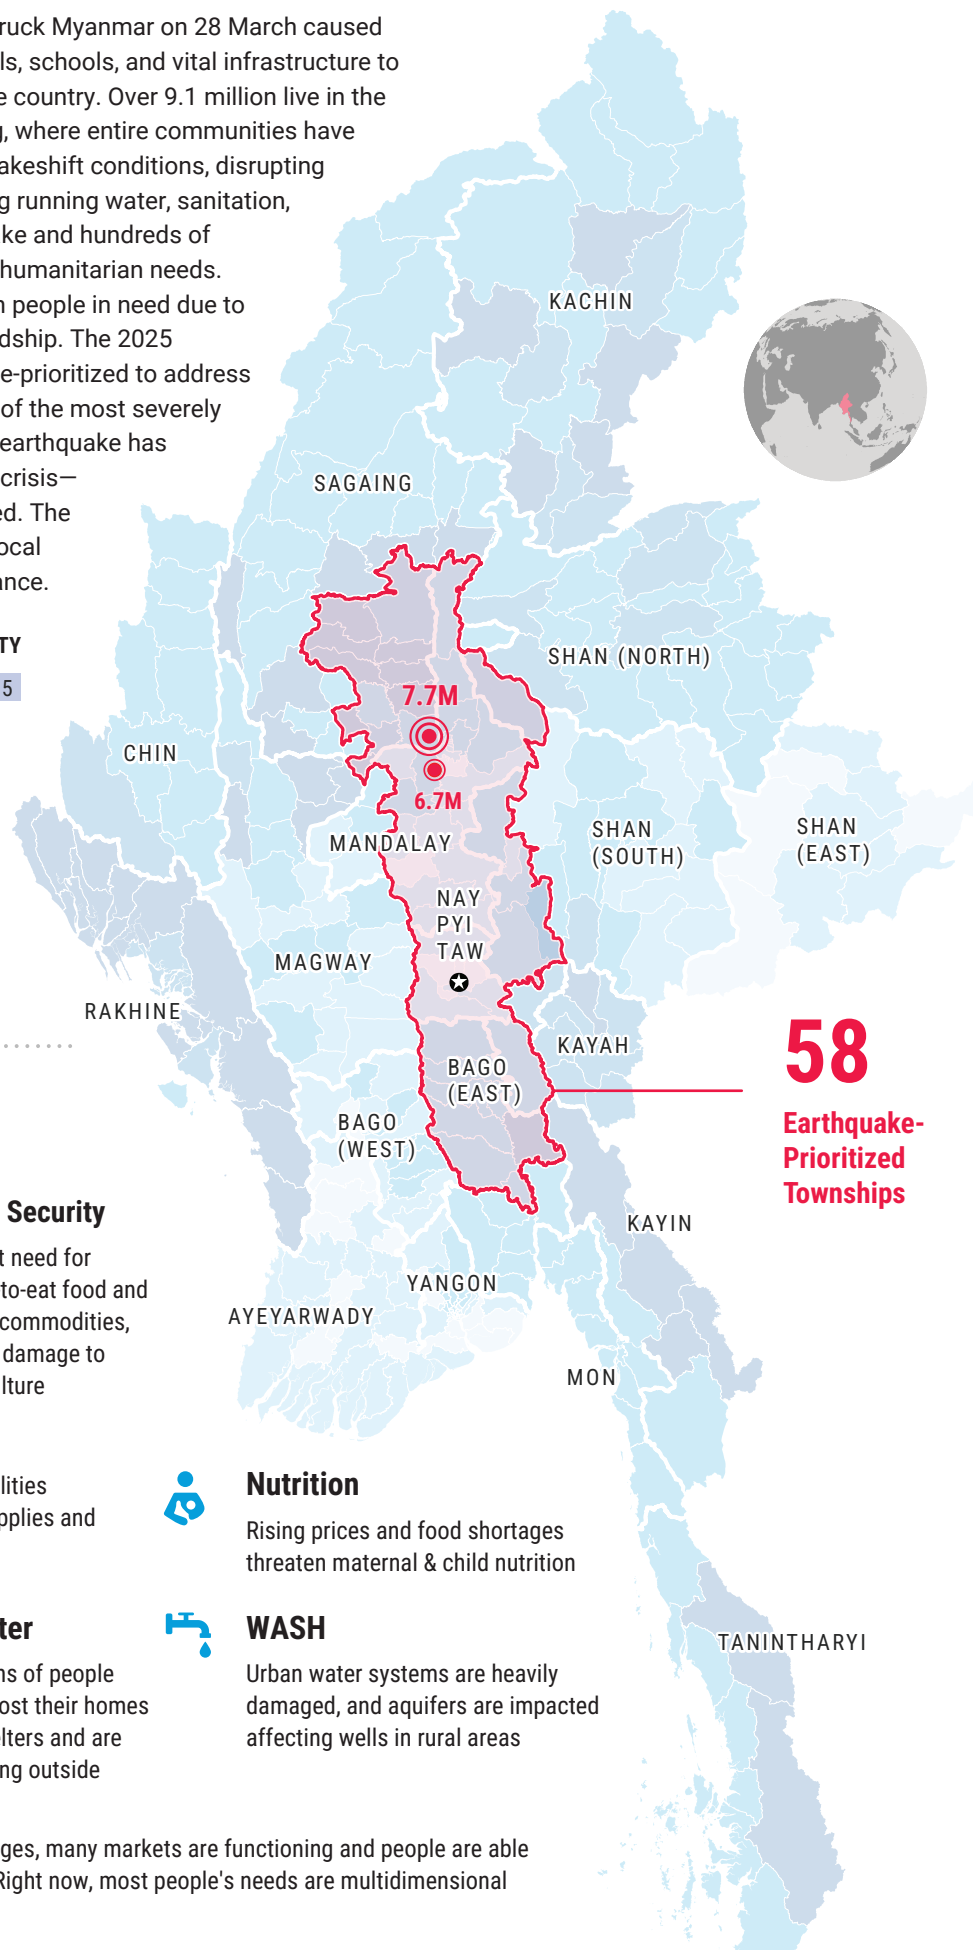

#### WASH

Urban water systems are heavily damaged, and aquifers are impacted affecting wells in rural areas

#### HNRP SEVERITY
